Conditions concerning the purchase of Poultry Breeding Material from the ARC Animal Improvement Institute

Limited numbers of quality poultry parent breeds are maintained at Irene for supply to discerning and prospective producers and consequently orders for hatching eggs and chickens are carried out according to a waiting list subject to confirmation of a 25% deposit.

Where facilities for rearing chickens to four week are also limited, orders for such material are subject to an agreement and full payment up front before commencement of incubation and rearing. It is also expected of the client to remove the order promptly at the required age so as not to compromise other orders. Material not removed will be sold to defray further rearing costs.

All prices include VAT and are quoted for material as fetched at Irene in own containers.

Although all efforts and precautions will be taken to supply healthy, disease free breeding material of high quality, ARC-Animal Improvement accepts no responsibility for losses or damage incurred due to negligence, mismanagement or accident occurring after dispatch of material.
