

2022 Hartswater moth traps

Shaded green block indicates the mean planting time, while the shaded yellow blocks indicate the harvesting time.

The shaded red block indicates the critical period for moth activity which could cause damaging larval populations.

- First graph indicates the original data received from the farmers.
- The second graph indicates the mean number of moths, while the dark blue arrows indicate the life cycles as forecasted by the average mean daily temperatures. Light blue arrows indicate 2022 weather data predictions.
- A third graph shows the mean number of moths as well as the mean temperature and rainfall per week.

27 September 2022: Warning

Please scout fields for the presence of false armyworm larvae, long-term climate data shows possible infestation from week 42 to week 47 (17 October 2022 – 27 November 2022)
